DETAILED ACTION

Allowable Subject Matter

1. Claims 1-6 are allowed.

Information Disclosure Statement

2. There are 2 references cited on the IDS filed May 3, 2005 that need discussion. US 5,635,797 to Kitakaze et al. (Kitakaze) discloses an anode for a magnetron. The anode is exemplified to have an internal diameter of 32mm-35mm with the spacing between the strap rings being unknown.
3. JP 56-149750 (JP '750) discloses a magnetron anode with a spacing of 1.1 mm between inner and outer straps, but the number of vanes and whether there is an alternating electrical connection of the vanes is unknown.
4. There is no motivation to use the strap spacing taught in JP '750 in Kitakaze. Further, Applicant has stressed in the specification that there are unexpected results that occur when the inside diameter of the anode body is below 32.5mm [0062] and above 34.5mm [0047]. Thus, the anode internal diameter claimed by Applicant is not necessarily obvious in Kitakaze because of the unexpected results.
